

# BEAR HUNTING CHECKLIST

These hunts are on the remote Alaska Peninsula with notoriously big bears and bad weather. A layering system of clothing and good rain gear is very important. Waders are also key to be able to cross rivers and tidal waters. Every day you will hike from camp to one of a few strategic spots to glass for bears. The temperature ranges from 35-65 degrees and you can expect a lot of rain. Camps are made of comfortable “bomb shelter” style tents that we base from.

## CLOTHING

- Stocking hat
- Gloves
- Ball cap
- Neck gaiter
- Good boots (Danner, etc)
